Ahmed Bargady

I am a 2nd year Data Science student at School of Information Science (ESI) and a fullstack web developer. I have 4 years of experience with more than 20 deployed apps in web developement using varius technical skills. I create machine and deep learning algorithms to solve real world problems basing on python language. I also use dynamic programming to optimize my algorithmic solutions.

Technical Skills

Likes: python opencv tensorflow scikit-learn pytorch seaborn numpy pandas scipy keras fastapi flask Javascript Typescripts java C++ php html sql node.js reactjs next.js blitz.js Docusaurus react-native spring-boot mongodb mysql graphql express.js appolo-graphql redux tailwindcss mui firebase wordpress git figma xd

Experience

Fullstack web developer -- GEEK Maroc   Jul 2021 ⟶ Sep 2021
web developement e-commerce, wp, woocommerce, graphql, next.js

I built an e-commerce web app for clients, to be able to customize there Born Arcads with a great user experience. I used Next.js (frontend), Wordpress woocommerce (beckend) and GraphQL (API).

President -- CODE ESI   Aug 2021 ⟶ Current
data science, web developement

The president of the IT club ESI: Club Of Data Engineers (CODE). Our planning for this year contiens 4 sessions (data analysis/visualization, web dev frontend, BI/AI, web dev backend)

Projects Cell Leader -- ENACTUS ESI   Dec 2021 ⟶ Current
Creating, Managing, Developing IT solutions

We participate in innovation competitions to find solutions to real world problems. We join the world of entrepreneurs by collaborating with clubs and other organizations through events and workshops.

Participant -- Ecole du Code (Orange)   19-23 Feb 2022
DevOps Fundamentals

I have attended the DevOps Fundamentals course, by an experienced and professional DevOps engineer. We built pipelines using jenkins, docker, java projects...

Participant -- Ecole du Code (Orange)   23-29 Feb 2022
machine learning mastering

I have attended the Matering class for machine learning presented by experts in data science. We used many technical skills to solve data science world problems by getting insights from brute data.

3rd Price -- HLSID ENSET-M   Jul 2021 ⟶ Sep 2021
meta-heuristic genetic optimization algorithm e-commerce, fastapi, nextjs, axios, react-hooks

In a team of 5 persons (ESI Dev) we built an interactive web app (ESI Drone) that uses meta-heuristic genetic optimization algorithm to solve drone delivery path optimization.
